

CDT901 Thermostat—Quick Start Guide

Thank you for choosing TCD901 Thermostat for your comfort requirements.

This thermostat meets the Energy Star guidelines and features built-in programs designed to save energy. To access the built-in energy savings program, follow these simple steps.

1. To activate the thermostat display, remove battery tab from batteries located on back of thermostat.
2. Press Heat or Cool to select the desired system operation mode
3. To set the current time, press CLOCK key on the touch screen display.
4. Hour and minutes will appear. Press ▲ or ▼ to set the current time.
5. To set the current date, please refer to user manual.
6. Press Done Key. The thermostat will run the preset energy savings program.
